Report on COVID-19 Awareness Programme at Kalinagar Mahavidyalaya

On March 20, 2020, Kalinagar Mahavidyalaya organized a comprehensive COVID-19 awareness programme at the AILA centre within the college campus. The primary objective was to disseminate crucial information about the virus, preventive measures, and create awareness among students and local residents. The programme featured a health team from Ghoshpur Block Health Centre, led by Dr. Utpal Hajra, Block Medical Officer of Health (BMOH).

The event saw active participation from both students and local people. A total of more than 150 participants were attended the programme. The collaboration with the Ghoshpur Block Health Centre facilitated expert insights and guidance on various aspects of the COVID-19 virus.

Dr. Utpal Hajra, along with the health team, conducted an informative presentation detailing various aspects of the COVID-19 virus. The discussion covered the mode of transmission, symptoms, preventive measures, and the importance of early detection. The programme included an interactive session where participants could ask questions and clarify doubts. This allowed for a better understanding of the virus and its implications within the local context.

Practical demonstrations on proper handwashing techniques, sanitization methods, and the correct way to use face masks were conducted to ensure that participants could implement these practices effectively in their daily lives.

The COVID-19 awareness programme at Kalinagar Mahavidyalaya on March 20, 2020, demonstrated the institution's commitment to community well-being and public health. By collaborating with health professionals, the college effectively conveyed crucial information to both students and local residents, contributing to a heightened sense of awareness and preparedness in the face of the pandemic. Such initiatives showcase the pivotal role educational institutions can play in disseminating accurate information and fostering a sense of responsibility within their communities.
