## REPORT OF SEMINAR( ONLINE)

Title/ Caption of the seminar: Nurturing the Environment.: A Path to Survival

Organized by: Depart of Geography

On occasion of: National Science Day

Date : 1<sup>st</sup> March. 2023

---

### Introduction:

Environment plays a vital role in our social economic life of the inhabitants of any country. It is indispensable in our day to day life also. But the fact is that the quality of environment is gradually decreasing since long. Keeping it mind its importance Department of Geography has organized a seminar on environment on the occasion of National Science Day i.e. 28<sup>th</sup> February. The topic was “ Nurturing the Environment- A Path to Survival” and the speaker was Dr. PanchaliMazumder, Associate Professor of Geography, East Calcutta Girls College, Kolkata.

### Objectives:

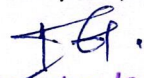

- 1) To aware the students about the environment and its degradation.
- 2) To aware the students about the various techniques to restore the healthy environment.
- 3) To aware the students about their surrounding natural environment like soil, water, forest air etc. and educate them about the mischievous effect of air pollution, ozone depletion, soil degradation and others.

### Descriptions and Key Points:

In her lecture Dr. PanchaliMazumder, explained the role of environment in social and economic life of people and how the development is affected by the degradation of environment. She tried to throw light upon the forest resource especially flora and fauna, wild life etc. and its associated eco-system and how the life of people is affected by them. She also explained how the productivity of different crops of sundarban delta is badly affected by the environmental degradation especially increasing salinity of soil, river bank erosion and so on. According to her human civilization will be ruined unless we take care our environment as a responsible mother takes café her beloved child.

### Conclusions:

At present time especially after the decade of eighty the quality of environment has been decreasing by leaps and bounds and it is equally seen throughout the world. If we educate our students about our surrounding environment and its degradation then they will be able to educate the whole nation to a great extent. In this way we can get a healthy and good environment in future. In this respect, this seminar has achieved a lot.
