REPORT OF WEBINAR

Name of the Program: World Environment Day, 2023

Topic for Webinar : Solid Waste Management: The Need of the Hour

Organized by : Department of Geography

Date : 5th June, 2023

Introduction: Solid waste management is now getting importance with the increasing trend of urbanization throughout the world. In our country where population crossed 140 crores, solid waste management has been the part and parcel of urbanization. It helps prevent pollution, protect the environment and conserve resources. Implementing effective waste management practices can reduce the spread of diseases, minimize the strain on landfills and promote recycling and reuse. Keeping in mind the enormous importance of solid waste management Department of Geography organized the said webinar in collaboration with the Internal Quality Assurance Cell of our college.

Objectives : The objectives of the said program was as follows.

- i) To aware the students about the environment and its role to save the earth as a whole.
- ii) To aware the students about the importance of solid waste management and its techniques of management.
- iii) To aware the students about the plastic throughout the world and make them understand about the harmful effect of pollution.
- iv) To aware the students about the environmental problem of the surrounding areas and advise them to reduce the extent of the problem.

Description and key points: Monisha Hembram, Assistant Professor of Geography, Bhairab Ganguly College, Kolkata, lectured about the said content through online platform, Google Meet. Near about 95 students attended the webinar She explained the types of solid waste and its treatment methods. She also discussed about the challenges and environmental concerns associated with these methods. In addition to this she emphasized upon the benefits of composting organic waste to create nutrient-rich amendment. Besides solid waste, she lectured about the role of environment to save the earth in brief and the harmful effect of plastic also.

Conclusion : There are no scientific management system of solid waste in many urban areas in our country which creates so many problems including crucial health hazards. So, awareness about the management of solid waste among the students may be helpful to cope up the said crisis. In our country.
